

Interim Administrator Community Meetings

Bowral/Burradoo – 24 November 2021

Issues raised	Response
<p>Bowral Waste Facility What is the life expectancy of the tip?</p>	<p>The lifespan of the Bowral Waste Facility is dependent on when the tip area is full and can be capped. This is a gradual process and the consent for that use does not include a specific end date. Over time various requirements have changed under the applicable legislation and this continues to be the case.</p>
<p>Bowral CBD masterplan Where is it up to?</p>	<p>A consultant brief is being prepared and will be reported to Council early 2022.</p>
<p>Station Street Item to Council about a block of land behind Eastbrook Medical Centre regarding sale of the land. When it is coming to Council to be sold?</p>	<p>This was reported back to Council Meeting on 8 December. Council resolved that a Traffic and Transport Study be commissioned to assess future road requirements and options for traffic management within the Bowral CBD.</p>
<p>Plastic recycling plant in Moss Vale A state significant development. What is the position of council on this proposal?</p>	<p>A briefing for residents will be conducted in early 2022.</p>
<p>Mittagong Pool What is happening with Mittagong Pool?</p>	<p>Council is engaging a consultant to undertake a Community and Recreational Facilities Strategy for the Shire as one integrated document instead of developing separate strategy documents (<i>Sports Facility Strategy</i> and <i>Aquatic Facilities Strategy</i>). The intent of this strategic approach is to ensure best use of community funds in the delivery of local, district and regional facilities and services. The <i>Community and Recreational Facilities Strategy</i> will guide the delivery of a sustainable and equitable network of facilities located in strategic and accessible positions across the LGA. The strategy will investigate options for a regional aquatic leisure facility and service provision for both present and future needs. This will guide the future of Mittagong pool.</p>
