

# Interim Administrator Community Meetings

## Fitzroy Falls/Avoca – 14 December 2021

| Issues raised   | Response  |
|---|---|
| How will Council be consulting / informing community of future developments or projects across the Shire. More community engagement needed!   | We agree and look forward to improving our services over the next few years as we build a new organisation. The current requirements for the public notification of applications is found within the adopted Community Engagement Strategy. This details that process, however, we are currently improving our website which will include more timely updates for the community subject to internal discussions and agreement with internal stakeholders. |
| More public awareness needed for approved events ie road closures / parking for events such as Bowral Classic   | We agree! This is an area where our website could be a very useful tool and updates provided on a daily basis. This is an ongoing project that will take time and resources and engagement of various internal and external stakeholders.   |
| Residents should be given option not to have a green waste  | Unfortunately, it is not manageable to keep track of which residents have opted in or out and keep track of bins presented – further enquiries can be made with RRC.  |
| Throsby Road, Fitzroy Falls overgrown trees lining streets/roadways in most streets around Fitzroy Falls. Throsby Street – Fallen trees reported to Council – works commenced by Council and still not finished (commenced as few weeks ago and have not returned to complete removal and clean up). Uprooted tree and another tree hanging that needs urgent attention, as leaning towards powerlines. | Works were completed 15/12/2021. This work was delayed due to wet weather causing site access issues.   |
