

Interim Administrator Community Meetings

Hill Top – 25 November 2021

Issues raised	Response
<p>Rosina St Hill Top</p> <p>The accumulation of “stuff” on the footpath (blocking the footpath) and the adjoining WSC land. The situation is an eyesore for the Community. We believe WSC has been proposing to take action (maybe through the ranger) about this situation which has been on-going for many years and causes great distress to local residents. An update on this situation would be greatly appreciated.</p>	<p>This is an issue we will review and work with internal teams to manage this issue.</p>
<p>After a site inspection in 2020, Council were concerned by the danger to pedestrians using the vehicular bridge (which is the only way to cross to the all shops and services...but there is no footpath on the narrow vehicular bridge) investigated options to advance the funding of a pedestrian walkway. Apparently, the design phase was completed some time ago but the funding has not been finally allocated. This is a horrendous situation for the Hill Top Community to endure.</p>	<p>The design phase of this project is included within the 2021/22 Capital Works Program. Programming of the construction phase will be subject to the final cost estimate upon completion of design which, given it is likely to be substantial, means it will likely also be subject to grant funding availability.</p>
