

# Interim Administrator Community Meetings

## Mittagong/Welby/Braemar - 18 November 2021

<b>Issues raised</b>	<b>Response</b>
<b>Locality sign</b> Where is the locality sign for Welby?	Two Welby locality signs will be installed in the first quarter of 2022.
<b>DA Tracker</b> Feedback: Adequate information not being provided – decisions have not been presented and not clearly stated once a DA is approved, DA changes have not been published. Not up to date. Example: Seniors Housing Development in Mittagong (Evans Street – Payton Street) specifically. Defects and drainage around seniors housing. No indications of section 94 contributions, legislation not being followed by Planners.	The DA tracker system is currently being reviewed. The current form is a system that we are aware needs upgrading. We have been discussing changes to that system to ensure a better service to the public directly linked to the assessment process as consistent with a number of other Council's. This process will take time and the agreement of internal stakeholders to achieve.
<b>Frensham Pool</b> Agreement was made between Frensham & WSC for community use of the pool and widening of the road and the entrance – what is happening?	As part of the development approval of the Frensham Pool, Council entered into a VPA agreement for the purpose of creating safe road access to the facility and ensuring that the facility would be available for public use. With the VPA being over 10 years old, Council staff are currently reviewing the details of the VPA and any potential implications on the current facility management.
