*This is a list of native plant species that Wariapendi usually has available in tubes.*

*This information is intended as a guide only.*

*While much effort has been spent in the research of plants, soil types, micro-climates, etc. it is difficult to be totally accurate in species selection for a specific site.*

*It has been found that these species do well in the specified localities but it is dependent upon soil type, frost, aspect, elevation, etc.*
