Explanation Table

Pricing Policy Principles

1	Full Cost Recovery	Recovery of all direct and indirect costs associated with providing a service, including in some cases, making provision for future capital expenditure.
10	Services to be provided free of charge	No charge is levied by Council for services under this category.
2	Partial Cost Recovery	Subsidised operations which are of benefit to the community as a whole, as well as individuals and in particular low income users.
3	Market Pricing	When Council provides a similar service "in competition" with other councils or agencies, e.g. sale yard fees, hall hire, etc., where people may go elsewhere if the fee is too high. This category also includes prescribed or recommended fees. Council will not use subsidies to aggressively price others out of the market or compete unfairly.
4	Rate of Return Pricing	Used for commercial activities.
5	Incentive Pricing	Where Council sets a fee structure to encourage people to "do the right thing" e.g. a scaled tariff that rewards low water consumers, library fines, etc.
6	Sewerage Pricing	6.1 Is not based on property values. 6.2 Collects revenue to fund the sewerage system from people who actually benefit from availability or use of Council's sewerage system. 6.3 Eliminates cross subsidies within the community. 6.4 Ensures Council derives sufficient income to: i. Operate the sewerage system, irrespective of seasonal fluctuations. ii. Provides for future capital expenditure and debt servicing. 6.5 Can be administered simply and cheaply and can be easily understood by the public.
7	Water Charging	7.1 Is not based on property values. 7.2 Collects revenue to fund the water supply system from the people who actually benefit from availability or use of Council's water supply. 7.3 Ensures Council derives sufficient income to operate the water supply system, irrespective of seasonal fluctuations and provides for capital and debt servicing. 7.4 Eliminates cross subsidies within the community. 7.5 Encourages conservation of water by having a scaled tariff that rewards low consumers. 7.6 Provides for future capital expenditure and debt servicing. 7.7 Can be administered simply and cheaply and be easily understood by the public.
8	Section 64 & Section 7.11 Contributions Pricing	To ensure Section 7.11 contributions accurately reflect the costs incurred by Council in providing infrastructure (roads, drains, sewerage, etc.), open space and recreational facilities, needed to meet the additional needs of the community created by new development and in doing so, ensure the local amenity does not diminish.
9	Prescribed Fees	Regulation or Act sets a maximum fee that can be charged.

22. TRADE WASTE SERVICES

Trade Waste (Liquid) Terms & Conditions

The following information should be read in conjunction with the Trade Waste fees and charges below.

"Business Consumer Service Availability Charge" refers to the minimum charge for each business premise connected to Council's sewerage system which charge depends on the relevant tariff class for that premise.

If the complexity of the application or applicant generates changes or problems, and so causes Council higher costs than are covered by the standard fee, then an invoice will be issued for those additional costs.

The special connection fee will be refunded if the application is not approved, and application processing costs has been covered by the standard application fee.

A fee will apply and a sundry debtor account will be issued, each time Council carries out one of the following:

- (a) routine surveillance inspection; or
- (b) inspection in response to specific problem; or
- (c) sample collection.

A fee will apply and a sundry debtor account will be issued, each time Council carries out sampling of effluent for analysis. The fee is in addition to the inspection fee and will be calculated based on:

- (a) freight costs to send samples for analysis; and
- (b) laboratory charges for analysis of samples.

These parameters relate to effluent strength where the discharge volume exceeds a rate of 20 kilolitres per day and/or 7,300 kilolitres per year. The fees will apply as additional fees to those for:

- (a) Business Consumer Service Availability; and
- (b) Volume

Strength and volume limits prescribed elsewhere in this Policy shall not be exceeded.
